

Prinoth/Track, Inc. Dealer Change Announcement

To complement its existing North American Regional Distribution Centers (RDC), PRINOTH LLC will assume the direct factory distribution of Alpine products in the Midwest from Track, Inc.

PRINOTH will have its own facilities located in the Midwest to handle sales, parts and service, effective March 31, 2010. This will conclude Track, Inc.'s three-year affiliation with PRINOTH as their Midwest Alpine Dealer.

Track, Inc. will continue as we have for 35 years as the exclusive Midwest dealer for Tucker Sno-Cat Corporation and as a manufacturer's representative for Dopplemayr-CTEC. We will be here to meet your needs with our existing products and services and continue to search for others consistent with our mission to bring the best to the Midwest.

We will continue to have parts and vehicle inventory available until March 31, so you may continue to order parts from us until that time. What we don't have will be drop shipped to you.

You have our pledge to do everything we can to make the transition from dealership to PRINOTH a smooth one. You will have the same level of customer service throughout this period and we welcome all questions you may have.

Our desire to continue to serve our ski area customers is second only to our appreciation of your commitment to provide winter recreation for people to enjoy throughout the Midwest. We value your business greatly and look forward to our continuing relationships.
